

Good practice collection state of play

- All partners provided reviews
- 36 Candidates reviewed, quite different scores (10 to 33)

For discussion

- How to get to a final score per candidate? Suggestion mean value and Ruth gets in touch if scores differ significantly
- Threshold: combination of % of reachable score & get approx. 20 final GPs
- Any categories where partners had specific difficulties/problems w evaluation?
- question: 'consumption related services' - on project or organization? Depends whether specific program or whole organization is candidate
